

WHAT IS CLAIMED IS:

1. A car body including:

an underframe formed of a first hollow member and a side structure formed of a second hollow member, which are welded together at two positions;

the exterior side of said first hollow member and the exterior side of said second hollow member are friction stir welded; and

a joint portion exists on a line extended either from an interior-side surface plate of said first hollow member or from a connecting plate that connects two surface plates of said hollow member.
